EDUCATION

Netaji Subhash Engineering College, Kolkata — Oct 2022 – July 2026
B.Tech in Electronics and Communication Engineering — *CGPA: 6.85*

Techno India Group Public School (CBSE) — 2020 – 2022
Class XII – 77% — *Chinsurah, West Bengal*

Gospel Home School (ICSE) — 2020
Class X – 88% — *Rishra, West Bengal*

EXPERIENCE

Summer Intern — IoT & Embedded Systems
Jadavpur University

- Completed a hands-on IoT internship covering sensor integration, microcontroller programming, and embedded systems design, working directly with physical hardware to translate coursework into working prototypes.

PROJECTS

Roomify — AI Interior Design Platform
React, TypeScript, Tailwind CSS, Flask/Python, SQLite, AI Image Generation API | Deployed on Render

- Built an AI-powered platform that transforms room photos into personalized interior design concepts based on selected style, mood, color palette, and design preferences.
- Developed the Flask/Python backend with SQLite storage and integrated an AI image-generation API to produce redesigned room renders.
- Built the React + TypeScript + Tailwind CSS frontend and deployed the full application on Render.

SceneSwap — Visual Scene Transformation App
React, TypeScript/JavaScript, HTML, CSS, Vite | Deployed on GitHub Pages

- Built a web experience that lets users reimagine and swap elements within a scene to create different visual compositions, using React and Vite and deploying via GitHub Pages.

What's In My Fridge? — Recipe Discovery App
React, TypeScript, JavaScript, HTML, CSS, Vite | Deployed on GitHub Pages

- Built a responsive recipe-discovery website in React/TypeScript that helps users find meals they can make using ingredients they already have at home, deployed on GitHub Pages.

Baithak — Curated Music Web App
HTML, CSS, JavaScript | Deployed on Vercel

- Built the entire audio-streaming UI and playback engine in vanilla JavaScript with no framework, handling state management, playlist logic, and responsive layout by hand.
- Built a responsive, mobile-friendly layout with background video and live listener-count display.
- Deployed and hosted the live application on Vercel with a public custom URL.

Smart Job Application Tracker (JobTrack)
Python, Flask, SQLite, HTML/CSS/JS | Deployed on Render

- Built a full-stack CRUD web app to track job applications (company, role, status, interview date, notes) end-to-end, individually.
- Designed the Flask backend with SQLite storage and implemented create, read, update, and delete flows connecting the frontend to the database via SQL queries.

IoT-Based Smart Plant Monitoring System
ESP32, Blynk, Arduino IDE

- Designed an IoT system using ESP32 to monitor soil moisture, humidity, and temperature in real time, with Blynk-based smartphone alerts and automated irrigation control via relay-based pump firmware.

TECHNICAL SKILLS

- Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL, HTML/CSS
- Web Development & Databases: React, Vite, Tailwind CSS, HTML, CSS, JavaScript (vanilla), Flask, SQLite, responsive design
- Tools & Platforms: Git/GitHub, VS Code, Vercel, Render, GitHub Pages, Figma
- Soft Skills: Problem Solving, Adaptability, Communication, Self-Learning

CERTIFICATIONS

- Front-End Development Bootcamp — Udemy: HTML, CSS, JavaScript.

LEADERSHIP / EXTRACURRICULAR

Mesmerizer (Fashion Show) — Event Head — 2024

- Led end-to-end planning and on-ground execution for the college's flagship fashion show, coordinating a volunteer team across logistics, scheduling, and event-day operations.

Athletics — State-Level Athlete — 2015 – 2020
